

VARIANCE STAFF REPORT

OFFICE OF PLANNING & ZONING

Tab Number: 2

Public Hearing Date: October 10, 2019

Case No. and Project Name: VAR-19-36-5, Bennett Property

Owner/Applicant: Sherman Bennett

Requested Action: Variance to Lake County Land Development Regulations (LDR) Section 1.08.02.A.1, to allow an expansion of fifty (50) percent (420 square feet) to an existing lawful nonconforming accessory structure in lieu of ten (10) percent based on the structure as it existed on September 22, 2011; and LDR Section 6.01.04.A.1, to allow an addition to an existing accessory structure to be located at 35.9 feet from the wetland line in lieu of fifty (50) feet.

Staff Determination: Staff recommends approval of the variance request subject to the conditions contained in the draft development order.

Summary of Request.

The subject parcel is identified by Alternate Key Number 1315433. The parcel is zoned Agriculture (R-7) by Ordinance 6-72 and is part of the Urban Low Density Future Land Use Category (FLUC). The subject parcel is currently developed with a single-family dwelling unit, two (2) carports, two (2) sheds, and driveway (Attachment A).

On March 30, 2018 the property owner was issued a notice of violation for building an awning on an accessory structure without a permit (Code Case No. 2018030353) . Staff was unable to issue a zoning permit for the awning because the awning did not meet the wetland setback. Lake County Land Development Regulations (LDR) Section 1.08.02.A.1, allows minor expansions to nonconforming structures so long as the expansion does not exceed ten (10) percent; and LDR Section 6.01.04.A.1, requires structures or buildings to be located at fifty (50) feet from the wetland line.

The Owner seeks approval to allow a 420 +/- square foot awning addition to an existing nonconforming structure with a setback of 35.9 feet from the wetland line in lieu of fifty (50) feet from the wetland line, as shown on Attachment A.

Staff Analysis.

LDR Section 14.15.02 states that variances will be granted when the person subject to a Land Development Regulation demonstrates that the purpose of the Land Development Regulation will be or has been achieved by other means, and when application of a Land Development Regulation would create a substantial hardship or would violate principles of fairness.

1. The purpose of the Land Development Regulation will be or has been achieved by other means.

“Property was an estate purchase w/existing buildings, an awning was added to existing shed/building resulting in a code violation. As advised I obtained structural drawings/certifications on awning/wetland survey, boundary survey etc. Enclosed my hard stems from awning being added to existing bulding for property improvements and not being approved. Granted a permit was later pulled and issued by the county.”

The intent of the Code, LDR Section 1.08.02, is to allow the continuation of nonconforming use or structure in its nonconforming state. The intent of the Code, LDR Section 6.01.04, is to protect the wetland area from erosion, sedimentation, water pollution, and other negative impacts that may be associated with land use activities. The variance request is consistent with LDR Section 6.01.04.A.c.4, which indicates that in no case shall the jurisdictional wetland line setback be less than 20 feet.

2. The application of a Land Development Regulation would create a substantial hardship or would violate principles of fairness. For purposes of this Section, "substantial hardship" means a demonstrated economic, technological, legal, or other type of hardship to the person requesting the variance. For purposes of this Section, "principles of fairness" are violated when the literal application of a Land Development Regulation affects a particular person in a manner significantly different from the way it affects other similarly situated persons who are subject to the Land Development Regulation.

“The awning is on the east side of the garage. The wetland area is behind the garage on the west side. The awning is on the oppositi [sic] side of the existing building from the wetland. I would like a varance [sic] to remain since it did not encroach on the wetland as the existing building provided and existing buffer and nothing has been built any closer.”

LDR Section 14.15.04 states that for the purposes of this section “substantial hardship” means a demonstrated economic, technological, legal, or other type of hardship to the person requesting the variance. Pursuant to LDR Section 10.01.01, the accessory structures must be located on the side or rear yard. However, due to the width of the subject property, the existing location of the canal, location of the residence and existing accessory structures the Owner is unable to meet the setbacks to the wetland line. Requiring the Owner to relocate the existing accessory structure in order to meet the fifty (50) foot setback from the canal would impose a signification financial hardship.
