

# Priority Project #7

Construct median divided entrance to OPMS parking lot

## Findings:

- ✓ During the Leesburg ES dismissal period, queued vehicles at the ES block the entrance to the OPMS parking lot, which forces vehicles desiring to access OPMS to enter through the one-way exit

## Recommendations:

- ✓ Construct a median divided entrance to the OPMS parking lot at the existing one-way exit
- ✓ Install a gate to close access to this new driveway following the clearing of the ES pick-up queue; recommend gate be left open except during MS arrival / dismissal times
- ✓ Connect new entrance driveway to existing parking lot with asphalt or gravel driveway; alignment to follow existing dirt pathway
