

Findings and Recommendations:

- ✓ The existing crosswalks are faded - Update and repaint the crosswalks to FDOT ladder style at the two school driveways and across Johns Lake Rd at the crossing guard.
- ✓ Current queuing at the drop-off area is significant, particularly in the morning. Traffic control is provided by Clermont Police, but they may be called out and unavailable at times. Conduct a study to consider the benefits / drawbacks of a potential signal at the drop-off / pick-up area entrance.
