Staff Analysis

The subject property is situated between John's Lake and State Road 50, between Hartle Road and Magnolia Pointe Blvd. The property is zoned Planned Unit Development (PUD) by Ordinance. The subject property is located within the Clermont JPA and ISBA. The City of Clermont did not provide comments on this application.

The governing PUD Ordinances, Ordinance #2015-46 and Ordinance #2019-29, allows for the property to be developed with an assisted living facility, single-family dwelling units, multi-family or townhome units, and 425,000 square feet of gross leasable commercial space. The application is seeking to decrease the number of multifamily or townhome units from 328 to 186 units in order to increase the number of single-family dwelling units from 460 to 547 units on Tract I (Alternate Key 1037425).

Standards for Review (LDR Section 14.03.03)

A. Whether the proposed rezoning is in conflict with any applicable provisions of the Code.

The application is consistent with the current development standards contained within the LDR.

B. Whether the proposed rezoning is consistent with all elements of the Lake County Comprehensive Plan.

The proposed rezoning is consistent with all elements of the Comprehensive Plan. Comprehensive Plan Policy I-1.3.2 Urban Low Density Future Land Use Category allows residential development at a maximum density of four (4) dwelling units per net acre. The proposed amendment will decrease the density from 3.78 to 3.52 dwelling units per net acre.

Vested Rights Determination (VRD) 2012-0006 allowed the Applicant to include 12.72 acres of wetlands in the open space calculations for phases one through five. Future development of the subject property, including the development of Tract I, will be required to adhere to the current open space requirements as established in the Comprehensive Plan and the draft PUD Ordinance reflects this requirement.

C. Whether, and the extent to which, the proposed rezoning is inconsistent with existing and proposed land uses.

The application seeks approval to develop more single-family dwelling units within the John's Lake Landing Subdivision. As such, the application seeks to decrease the number of multi-family/townhome units allowed within the development to offset the impact associated with single-family dwelling units.

D. Whether there have been changed conditions that justify a rezoning;

The application seeks to develop more single-family dwelling units in lieu of multi-family or townhome units.

E. Whether, and the extent to which, the proposed rezoning would result in demands on public facilities, and whether, or to the extent to which, the proposed rezoning would exceed the capacity of such public facilities, including, but not limited to police, roads, sewage facilities, water supply, drainage, solid waste, parks and recreation, schools and fire and emergency medical facilities.

The rezoning will not adversely impact the County's adopted levels of service for schools, parks, recreation, police, drainage, solid waste, and fire and emergency medical facilities. Any future development of this property will require an analysis to demonstrate that the proposed development does not adversely impact the County's adopted levels of service.

Water and Sewage – The subject property will be supplied potable water and wastewater services by the City of Clermont.

Transportation – Per ITE trip generations, 142 townhome units has an average daily trip generation of 5.81 trips per unit which equals 825 daily trips and 87 single family detached units has an average daily trip rate of 9.52 trips per unit which equates to 828 daily trips per unit. The rezoning amendment will not have a significant impact on the area's transportation system. Impacts on the transportation system will be fully assessed during preliminary plat review.

Solid Waste – Lake County Solid Waste Division has indicated there is sufficient capacity to support this project.

Schools – The application is seeking to convert 142 multi-family / townhome units to 87 single-family dwelling units. The conversion results in a decrease in density which will result in a decrease in the number of students estimated to be generated for phase 6. The Lake County School Board indicated that the level of service standards for each school level will not be exceeded by the students generated from this residential development.

Fire and Emergency Services - Lake County Fire Station #90, located at 13341 Hartle RD in Clermont, is located approximately 0.96 miles west of the subject property.

F. Whether, and the extent to which, the proposed rezoning would result in significant adverse impacts on the natural environment.

All new development will be required to meet all Comprehensive Plan Policies and LDRs, as amended, to protect the environmentally sensitive areas within the subject property.

G. Whether, and the extent to which, the proposed rezoning would affect the property values in the area.

There is no indication that the rezoning application will affect property values in the area.

H. Whether, and the extent to which, the proposed rezoning would result in an orderly and logical development pattern.

The John's Lake Landing development allows a mixture of uses including an assisted living facility, single-family dwelling units, multi-family or townhome units, and commercial space. The application is to facilitate the development of Alternate Key 1037425 with single family dwelling units in lieu of townhomes. The southern and western boundaries of alternate Key 1037425 abut single family dwelling units which would result in an orderly and logical development pattern.

I. Whether the proposed rezoning would be in conflict with the public interest, and in harmony with the purpose and intent of these Regulations.

The proposed rezoning application is in harmony with the general intent of the Comprehensive Plan and LDR as stated in Sections A through H above.

J. Any other matters that may be deemed appropriate by the Lake County Zoning Board or the Board of County Commissioners, in review and consideration of the proposed rezoning.

Not at this time.
