Engineering and Design Services of  
Hartwood Marsh Road – Phase 1  
21-0921  
Lake County, FL**

**4. Subcontractors**

#### 4. SUBCONTRACTORS / JOINT VENTURES

Heath & Lineback will manage the project and provide roadway design services as well as quality management. We have assembled a talented, experienced team to support the design efforts, and they are all committed to bringing quality deliverables to the County. The Valerin Group, Inc. is a certified MBE firm.

Services Provided	Firm
Traffic Signals	DRMP, Inc.
Environmental Permitting	DRMP, Inc.
Surveying	Southeastern Surveying & Mapping Corporation
Utility Coordination/Permitting/Property Owner Coordination	T2 Utility Engineers
Public involvement	The Valerin Group, Inc. (MBE)

**DRMP, Inc.** (DRMP) - Built to Deliver Innovation - Communication. Collaboration. Innovation. These are the qualities any multidiscipline firm needs to develop sustainable infrastructure today. The difference with DRMP is they put these ideas into action. Their expert staff of engineers, surveyors, planners, scientists and inspectors work together to offer a broad range of services throughout the Southeastern United States. By bringing every perspective to the table, DRMP makes powerful ideas a reality while transforming the communities they serve. DRMP is well-known for delivering innovation to our clients with every project. This mindset has led to long-lasting client relationships and consistently being ranked in *Engineering News-Record's* 'Southeast Top Design Firms' and 'Top 500 Design Firms' in the United States.

Founded in Orlando in 1972, **Southeastern Surveying and Mapping Corporation** (SSMC) is an independent, 100% employee-owned geomatics services firm providing professional surveying and mapping, subsurface utility engineering (SUE), and geographic information systems (GIS) services serving Florida and the Southeastern United States. Their staff of over 200 personnel includes 21 licensed Professional Surveyors and Mappers, one Professional Engineer, 39

nationally Certified Survey Technicians (CST), 2 Engineers in Training (EI), 5 internationally Certified GIS Professionals, 4 licensed unmanned aerial vehicle (UAV) pilots, and dozens of highly experienced survey, computer-aided design (CAD), and GIS technicians. To maintain their commitment to meeting customers' needs, SSMC has worked tirelessly to develop highly innovative and needs-specific solutions for numerous municipal, public transportation, private development, and infrastructure improvements. At the forefront of technology, SSMC uses state-of-the-art equipment, leading-edge software, and cutting-edge processes to drive results. SSMC provides the personalized touch of a small company with the resources of a large firm and continually strives to live by their motto: "*Proven commitment to our clients' success*".

**The Valerin Group, Inc.** (Valerin), a full-service communications firm and certified WBE with the State of Florida and DBE and SBE with FDOT, specializes in public engagement, community outreach, marketing, graphic design, website and mobile app development, visualizations, multimedia, video productions, aerial drone imagery, and translation services. Valerin's talented staff of communications and creative professionals have more than 425 years of combined experience and have worked on over 600 projects, campaigns, and initiatives for FDOT, expressway and

transit authorities, planning organizations, municipalities, and counties, including **Lake County for the CR 436 Realignment** design project. Since 2006, Valerin has worked on a wide range of public sector projects involving planning, PD&E studies, design, design-build, construction, safety campaigns, creative and video productions.

**T2 UES, Inc. d/b/a T2 Utility Engineers (T2ue)**, formerly Cardno, specializes in providing reliable underground and above-ground utility information to reduce the risks that utilities present to infrastructure projects. T2ue helps clients manage the complexity of existing utilities with their professional and comprehensive Subsurface Utility Engineering, utility coordination, and surveying services. Their mission is to provide project stakeholders with quality utility information, professional insight, and deliverables that streamline construction, improve project safety, and set the standard for the utility engineering industry. Since 1993, their reputation has been built on providing incomparable service based on high standards of technical ability and project understanding. With nearly 300 associates and 24 offices across the US, including five Florida offices, T2ue can quickly mobilize resources at a moment's notice.
