ERC is a family-owned and operated recycling center established in Florida in 2007. We are open to the public, welcoming residential and commercial recyclers.

Our goal is to reuse and recover components found in e-waste while striving to minimize the impact on the environment by managing used and end-of life electronic equipment. We are continuously working to improve our performance through responsible recycling practices complying with Federal and standard regulations.

ERC has continuously worked with many profit and non-profit organizations including several Counties, Goodwill Industries throughout Florida, University of Miami Hospital, Visa International, Samsung Electronics and Lennar Homes among many others.
