MAS Environmental, LLC

205 North Armenia Ave, #102

Tampa, FL 33609

Section 3 – Proposed Solution

MAS will mobilize the experienced field geologists to locate the County designated monitoring wells per the provided sampling schedule. All sampling activities will be conducted in accordance with the FDEP Standard Operating Procedures and industry accepted practices. The report will include, but not be limited to the field activities summary, and an evaluation of exceedances, cumulative tables and graphs.

MAS staff will be equipped with all necessary tools and maps to locate and identify the monitoring wells. Damaged wells will be identified and the condition will be documented and supported by photographic evidence. MAS will communicate with the County regarding any unexpected circumstances identified in the field prior to demobilization from the site. Upon receipt of the laboratory report, MAS will evaluate the quality control against the reported data. Damaged wells will be replaced by a licensed driller and these activities will be supervised by a Professional Geologist, upon County approval and authorization.
