

Section 3

Proposed Solution

Progressive is prepared to provide the County with high quality professional geologic and hydrogeologic services to efficiently and successfully complete the work outlined in the RFP (22-903). A concise description of our proposed solution to this work is as follows:

- The project will be staffed with dedicated professionals, experienced in management and oversight of geologic and hydrogeologic work at solid waste management facilities.
- Progressive is uniquely adept at efficiently servicing all aspects of this project, including but not limited to permit acquisition, data review, subcontractor coordination, monitoring plan review/design, and recommendations for future monitoring.
- Data provided by the County will be evaluated by the project team to:
 - Identify opportunities to improve the quality of field/analytical data;
 - Eliminate redundant data collection and optimize data collection efforts;
 - Design a monitoring plan that is both cost-effective and robust.
- Progressive will provide active coordination with County staff responsible for data collection to communicate project needs, determine the need for well repair/abandonment/installation, and ensure adequate data are collected to facilitate recommendations for future monitoring.
- Effective and thorough review of site data and routine communication with field staff will be used to ensure that the routine reports prepared for the site by Progressive will be accurate and thorough and that project recommendations presented to Florida DEP are informed, justified, and supported by the data.
