I received a complaint some weeks back from Noble about "rocks" being placed out next to the road at the intersection of Golden Gem Dr. and Wilson Parrish Rd. I went to the residence and Asked the older lady who answered the door about the rocks. She told me to hold on, she would go get her son. A man then came to the door and I asked him about the rocks and he told me it was to keep people from driving on his yard. I explained to him that the rocks were not on his property, they were on county right of way and they posed a potential safety issue. He was very annoyed with me for telling him they had to be moved back off of the right of way. He told me he would move them back. I told him if he didn't, I would have to turn it over to code enforcement and they would probably make him move ALL of the stuff he had outside his property line. When I went by the property yesterday, he moved the rocks less than a ft., as seen by the dead grass in the photo. I want the rocks moved back as he was instructed to do last month please.
