CARL Request # W004924-091617 - "There is a large oak tree in front of my house in the right of way that is being eaten by carpenter ants. The middle is getting pretty rotted out and I am concerned that the tree may become a danger and topple over in a storm if it gets completely eaten. I am also finding the ants in my house and they may be coming from the tree. Can you please remove the tree before it becomes a danger?"
