Subject: Re: James Nuckoles.....Sunnydale St.

Randy, per Jim's direction please schedule to remove the material from the yard. Let's be sure to get a right-of-entry before any work begins and it's ok if you can't get out there until the end of the week. It would be ideal if you could re-establish the berms, but only if they won't be driven over. The berms will help in a small rain, but certainly not with a gully washer.

Jim said that when he talked to this gentleman he told him the solution to this continuing problem is a SA, and he offered to have a neighborhood public meeting to discuss. We'll see where that goes.

Thank you,
Lori

Subject: James Nuckoles.....Sunnydale St.

I received a complaint this morning from Mr. Nuckoles about the lime rock we put on Sunnydale St. and Sleepy hollow washing into his yard and he wants us to remove it. I made a trip out to the residence and he was right about some lime rock washing into his yard, along with sand and everything else that was on them roads. That area had obviously had a huge amount of rain over the weekend and the water did what it does, flowed down hill. The burms of dirt we had built a few years ago were washed into. The two places they washed was where they drive over them with their cars. I called Mr. Nuckoles to talk about his problem and when he picked up the phone I greeted him with a "good morning" and his reply to me was "Mr. Stivender" at which I replied "no I was not, but we do work for the same people" and that is when he told me he did not want to hear how much of an idiot he was for building in a hole because the county passed all the permits for him to do so. He went on to say that he is "so over this mess once and for all and he wants it fixed right so he can move on from it." Before I could hardly begin to speak he interrupted me by saying Stivender was calling him right then on the other line and he appreciated me calling him but he needed to take his call. I will wait to hear from one of you before doing anything more.

Dennis,

Niki, from the County Manager's office, called to find out history on these roads. She says that Christine Niezgodzki called and is very upset about the condition of her road. She said that she didn't want anyone from the Road Department to call her ... she wants to talk to the County Manager. Remembering that there had been some past interaction with this lady, she wanted to know what we had done in the past before having Darren call her back.

I briefed Niki on some of the requests we had received as well as some of the work we had done. She wanted to know if your office would have any information to add. Wasn't this the area that we had put down clay one time and had to go back out and take it back up again? I've attached everything I have on these 2 roads for

your review prior to its getting sent to Niki.

Thank you,

T

October 22, 2010

Mrs. Christine Niezgodzki
26401 Sleepy Hollow Street
Sorrento, Florida 32776

Dear Mrs. Niezgodzki:

As I promised earlier this week, I rode out to your home this morning and looked at the road situation on your street and at the intersection that you had mentioned to me during our call. As you know, you live on a road that is not maintained by the County. The Board of County Commissioners has authorized the Public Works Department to provide enough maintenance on non-maintained roads that are publicly dedicated such that emergency vehicles would be able to access properties on these roads. I was able to drive to your house and through the intersection using a two wheel drive vehicle. I did notice that sand is accumulating (particularly at the intersection) and of course, the lack of rain has exacerbated the situation. But at this time there should not be an issue with emergency vehicles traversing these roads. I have asked the Public Works Department to continue to monitor the roads in this area, and if they become impassible for emergency vehicles, emergency maintenance will be done.

Also, as we discussed, the ultimate solution appears to be having the roads in this area improved and paved. The County has a program where the County will pay 1/3 of the cost of such an improvement with the balance of the costs paid by owners of property on each side of the road. Before the Board will proceed with such a project, a majority of the property owners generally must consent. If this solution is something that you think you and your neighbors would be interested in, please let me know and I will have the County Right-Of-Way Division begin the process. Should you have any further questions or comments, do not hesitate to contact me.

Sincerely,

Sanford A. Minkoff
Interim County Manager

Dennis and I met with Mr. Nuckles today. This is the location where several non-county maintained roads drain into their yard. He and his neighbors have done a lot of work to help themselves. We are going to grade the area to make it passable and he said he could take it from there. It was a good meeting.

Subject: RE: Sunningdale St.

I went to the residence of Ms. Nucoles and found many yards of dirt washed into her yard. No clay was visible, however I am sure it is there under the sand. Before we put the clay down on Sleepy Hollow in 2006, emergency vehicles could not have made passage. The clay we put down on non-maintained roads is minimal, for as directed, we are to only make the roads passable. There will always be problems with road material washing into the Nucoles residence because they are at the very bottom of a steep four way intersection of dirt, non-maintained roads. The only way to prevent this problem would be to pave the roads. I have attached photos of the problem.

Randy

Please take a look at this. It is off the end of Prestwick Ave. in Mt. Plymouth. Some years back we had calls about non maintained roads needing clay to keep passable for emergency vehicles in that area. We put clay on Sleepy Hollow in May 2006. Let me know what your findings are.

Subject: Sunningdale St.

Hi again. I may have already contacted you about this. If I have, please just brief me on what, if anything, has happened. Katrina Nucoles lives on the corner of Sunningdale St. and Sleepy Hollow in Sorrento. She says that the roads are not county maintained, and they don't wish for them to be. A few years ago, the county put clay on Sleepy Hollow. Because of the downpours, she claims that the clay has washed off the road and caused a 20 x 20 area of dirt and clay to collect in her yard. She wonders if there is anything the county can do to help get rid of the clay. I guess I need a little history of this one, too.

Thanks.
Linda
