These proposed signals are within the City Limits of Mount Dora. Charles Revell is in charge of their electrical department which includes maintaining traffic signal within the city. He requested and received plans for this project.

Thanks  
Denis

Denis,

Per our later discussion, we are fine with specifying the Naztec controller assembly rather than Peek. I will check on the illuminated signs.

We will reflect your preference in our comments. Would you be installing City Logos on the overhead internally illuminated signs for the City Streets involved? We will install County Logos for the County Streets.

Thanks,  
Denis

Denis,

Let's talk about our comments. Since the City would be maintaining these intersections with our staff, I would prefer that Peek controllers be specified, to maintain consistency with our other 9 intersections.

Thanks,  
Charles

This looks like a County Project. Our comments for the Signal plans would be to specify a Naztec controller assembly among other things. I will make sure that you are copied on the County Comments. Sharon Lewis will be sending them out.

Thanks,  
Denis
