Details

Email sent to J. Johnson: "The existing curb ramp has water ponding on it. Is it possible for the maintenance barn to cut swales in 100 ft each direction about 1' to 1 1/2' deep? This should allow for the rain water to run off and allow for the curb ramp to be usable during and after rains. If I remember right this was installed using the RS Means contract with Ruby. I think either Dennis or Kristian put this one together."
