PROJECT HISTORY

Five previous permits have been issued for the Kings Ridge development :

permit	description	issuance date
42-069-1062N	Kings Ridge: Phase I	Jun 95
40-069-0196	Kings Ridge: Phase II	Oct 95
4-069-0326-ERP	Kings Ridge: Phase III	Feb 96
4-069-0326M-ERP	Kings Ridge: Phase IV	Aug 96
4-069-0326M2-ERP	Wellington @ Kings Ridge	Aug 97
4-069-0326M3-ERP	Danbury Mill Boulevard [present application]	--

A stormwater permit (#42-069-1062N) authorized the construction of Phase I, a 17.9-acre project that included an entrance road, model homes, and sales center. Phase II (#40-069-0196) of the project consisted of three, dry-retention ponds and two, existing dry-retention ponds (i.e., relict sinkholes), and a temporary dry-retention pond. Phase III of the project consists of a residential development with 145 lots and 11 holes of golf for a future 18 hole golf course. The surface water management system for phase III includes 299.3 acres of area (38 acres of subdivision and 261.3 of mass grading) served by 10 retention ponds). Phase IV of the project is Wellington subdivision, consisting of 20.2 acres with 96 lots, and 3,155 linear feet of road with the associated surface water collection and conveyance system. No ponds were proposed with that permit.

Danbury Mill Boulevard is 1767 linear feet of road with the associated stormwater collection and conveyance system. The project lies within the Kings Ridge Planned Unit Development for which a master surface water plan has been previously permitted and constructed as part of Kings Ridge Phase IV (permit # 4-069-0326M-ERP). This permit is only for Danbury Mill Boulevard, and no lots will be constructed under this permit.

*Under the post-development condition the runoff will be conveyed to the existing permitted surface water management system. The existing surface water management system has been designed to retain the entire run-off generated by the 25 year 96 hour storm event on-site, and recover the total volume within fourteen (14) days. The existing system is also designed to provide the required water quality treatment, and recover this volume within seventy two (72) hours following the storm event. The proposed construction has no encroachment to a flood plain area. The site is located within the Ocklawaha River Hydrologic Basin. The design as proposed meets the applicable Ocklawaha Basin criteria. Most of the system has been constructed. The applicant has demonstrated that the existing surface water management system will provide treatment and recovery of the required pollution abatement volume, and volume storage of runoff, pursuant to chapter 40C-42, 40C-41, and 40C-4, F.A.C.*

Staff believes this project, as proposed, is consistent with the objectives and criteria of the District set forth in Chapters 40C-4, 40C-41, and 40C-42, F.A.C.

SUBJECT: Interested Party  
 Lake County

Dear MR. GARNER:

In compliance with your request for notice of applications received in Lake County, enclosed is a copy of Section C - Environmental Resource Permit Notice of Receipt of Application, Section A of the application, and a location map for each permit application applied for within the above referenced county.

Permit applications beginning with a "42" followed by an "I" (for example, 42-109-0001AI) or a "4" are Individual permit applications that require the District Governing Board to act on (approve or deny) the application. For these applications, you are advised to notify the District within 14 days of receipt of this letter of any questions, objections, comments or information regarding the proposed system. Those who file a written request for further information regarding the permit application will be furnished the information requested prior to the Governing Board meeting at which the application will be considered.

Permit applications beginning with "42" (without an "I" in the number) or "40" are General permit applications that are issued from the Service Centers. For these applications, any substantial objections to the permit application must be made in writing and filed with (received by) the District Clerk, located at P.O. Box 1429, Palatka, Florida, 32178-1429, on or before 14 days from date of posting of the notice of receipt of application. The posting date is shown on the bottom of Section C in the shaded block designated as "For Agency Use Only", and adjacent to "Date to be posted". A substantial objection means a written statement directed to the District which identifies the objector, concerns hydrologic or environmental impacts of the proposed activity and relates to applicable rule criteria. If a substantial objection is received, the procedures applicable to an Individual permit application will be followed. The receipt of a substantial objection will entitle you to an individual notice prior to the Governing Board meeting at which the application will be considered.

Permit applications beginning with "400" are Noticed General Permit applications. For these applications, any objections as to whether the proposed activity qualifies for the requested noticed general permit must be made in writing and filed with (received by) the District Clerk, P.O. Box 1429, Palatka, Florida, 32178-1429, on or before 14 days from date of posting of the notice receipt of application. The posting date is shown

on the bottom of Section C in the shaded block designated as "For Agency Use Only", and adjacent to "Date to be posted". If no timely objections are received, District staff will notify the applicant within 30 days from the date of receipt of notice of intent, whether the proposed activity qualifies for the requested noticed general permit. If timely objections are received, the procedures applicable to an Individual permit application will be followed in determining compliance with the terms of the Noticed General Permit. As compared to noticed general permit procedures, procedures for individual permits require that the District Governing Board act on (approve or deny) the application.

Sincerely,

*Gloria Jean Lewis*
