of a surface water management system for construction of a 46 lot residential subdivision and a 1.633-acre road within the Kings Ridge P.U.D. The surface water management system includes discharge to an existing dry retention pond.

LOCATION OF SYSTEM:

The project is located approximately 3 miles south of Clermont on the east side of US Highway 27, within the Kings Ridge P.U.D., in Lake County.

PROJECT HISTORY:

A stormwater permit #42-069-1062A was issued for Phase I of the Kings Ridge development on June 28, 1995. This permit authorized the construction of a stormwater system consisting of a 17.85-acre project including an entrance road, model homes, and sales center. General surface water management system permit number 40-069-0196 was issued for Phase II. Phase II of the project consisted of three dry retention ponds and two existing dry retention ponds (two depressional areas), and one temporary dry retention pond. Phase III of the project consists of a residential development with 145 lots and 11 holes of golf for a future 18 hole golf course. The surface water management system for Phase III includes 299.27 acres of area (38 acres of subdivision and 261.27 of mass grading and 10 retention ponds). Phase IV of the project is Wellington Subdivision, consisting of 20.16 acres with 96 lots, and approximately 3,155 linear feet of road with the associated surface water collection and conveyance system. The Danbury Mill Blvd, a road within the master drainage system was permitted on November 17, 1997. Southerland at Kings Ridge permit number 40-069-0196M2-ERP was permitted on December 17, 1997. Wellington Phase III at Kings Ridge is a 46 lot single family subdivision within the master drainage system.

|---------|-------|
|---------|-------|

Recovery Of Water Quality Volume Within Required Time $Y \times N \square$

Recovery Of Peak Attenuation Volume Within Required Time Y $x \in N \square$

Other Engineering Comments:

The proposed activity is for construction of 46 single family lots, approximately 1,855 linear feet of road with associated stormwater collection and conveyance system. This project is located within the master drainage system. Based on condition number 26 of the previously permitted project (permit # 4-069-0326M2-ERP) this project is qualified to obtain a general permit. The runoff will be conveyed to the dry retention pond within the master drainage system and retained on-site.

Staff believes this project, as proposed, is consistent with the objectives and criteria of the District set forth in Chapters 40C-4, 40C-41, and 40C-42, F.A.C.

ENVIRONMENTAL REVIEW:

The proposed project site is within the Kings Ridge PUD and consists of upland grasses. There are no wetlands or surface waters within the project area.

Staff believes that the proposed project meets all applicable conditions for permit issuance pursuant to sections 40C-4.301 and 40C-4.302, F.A.C.

Project History:

(pre-application meetings; related permits; previous/existing violations(if they exist))

A stormwater permit #42-069-1062A was issued for Phase I of the Kings Ridge development on June 28, 1995. This permit authorized the construction of a stormwater system consisting of a 17.85-acre project including an entrance road, model homes, and sales center. General surface water management system permit number 40-069-0196 was issued for Phase II. Phase II of the project consisted of three dry retention ponds and two existing dry retention ponds (two depressional areas), and one temporary dry retention pond. Phase III of the project consists of a residential development with 145 lots and 11 holes of golf for a future 18 hole golf course. The surface water management system for Phase III includes 299.27 acres of area (38 acres of subdivision and 261.27 of mass grading and 10 retention ponds). Phase IV of the project is Wellington Subdivision, consisting of 20.16 acres with 96 lots, and approximately 3,155 linear feet of road with the associated surface water collection and conveyance system. The Danbury Mill Blvd, a road within the master drainage system was permitted on November 17, 1997. Southerland at Kings Ridge permit number 40-069-0196M2-ERP was permitted on December 17, 1997. Wellington Phase III at Kings Ridge is a 46 lot single family subdivision within the master drainage system.

Files indicate a letter from J. Dandenault, SJRWMD Compliance engineer, on November 8, 1996 notifying of Kings Ridge PUD Phase II erosion and recovery problems in the existing stormwater management areas. These issues have been resolved, per J. Dandenault.
