Hello Don,

This is in follow-up to our conversation yesterday concerning the referenced application. Attached are the basin maps that I found when reviewing the files. What I found is that Pond A was original permitted for construction as Pond C under Permit Series 56726. The as-built for Pond A was requested in the RAI for Permit 76138-2. No as-built certifications could be found under Series 56726; however, an as-built was submitted under Permit 76138-2. According to the TSR for 76138-2, Pond A was designed to retain the entire 25/96 storm. I plan to change the application number for Johns Lake Road to Series 76138 because of Pond A.

Please call me if you have questions about the RAI. Have a great day!

Sandy
