Re: Engineering As-Built Certification, *Eastridge Water Treatment Plant*  
Permit Number 42-069-76464-1

Dear Mr. Farner:

The District received an Engineering As-Built Certification for Eastridge Water Treatment Plant on August 23, 2000. Pursuant to receipt of this certification, the project site was inspected on March 18, 2002. Our inspection indicates deviations from the authorized plans and specifications that require corrective action. District rules require that surface water management systems authorized under our permitting program be constructed, operated, and maintained, in accordance with the permitted plans and specifications. The following corrective actions are required at this time:

#### Retention Area

- Erosion problems were noted at the outfall. Please repair this area.
- Excess sedimentation was observed in the energy dissipater. Please remove the sediments from this structure.

Failure to construct, operate, and maintain, your system in accordance with the permitted plans and specifications is a violation of District rules subject to potential enforcement action. Please complete the requested corrective actions within 30 days of your receipt of this letter. This project will be reinspected within the next 60 days.

Thank you for your cooperation with the District's Environmental Resource Compliance program. If you have questions about the above information, please contact me at (407) 659-4833.

Sincerely,

William E. Carlie Jr., Compliance Manager  
Division of Environmental Resource Compliance
