Compliance Number: 922160

Dear Ms. Turner:

A routine compliance review of your project site was conducted on April 8, 2009. The basis for this review was that no engineering as-built certification had been received for your project and the permit has expired. The District Contractor has observed that your project has been completed and is in compliance with the permitted plans and specifications, with one exception, that an as-built certification has not been submitted. Please submit an as-built certification (EN-45 Form), signed and sealed by a professional engineer, in accordance with condition 10 of your permit, within the next thirty (30) days from the receipt of this letter. Failure to do so may result in further enforcement action.

Thank you for your cooperation with the District's Environmental Compliance program. If you have questions about the above information, please contact me at (407) 659-4833.

Sincerely,
