FOREST DEVELOPMENT ROAD COOPERATIVE AGREEMENT
U.S. FOREST SERVICE AND LAKE COUNTY, FLORIDA

Schedule A Amendment

This following item is an addition to the revised Schedule A completed in April 1990:

13. The Forest Service (Ocala National Forest, Seminole Ranger District) will permit clay to be extracted, hauled and placed on public county roads by Lake County Division of Development and Public Works. The existing clay pit is located in N.E. 1/4 of Section 35, Township 17 South, Range 26 East, Marion County, north of State Road 42 on National Forest Land.

Lake County will accept responsibility of reclamation of the pit, and maintenance of the entrance road and pit during the operational period. This work will be completed according to the Forest Service specifications.

All National Forest survey monuments and witness trees will be protected, and no trees will be cut until notification and permission is given by the Forest Service.

The Forest Service holds the right to access, gather, and haul clay on Forest Service roads on the Ocala National Forest.

On a fiscal year basis from October 1 to September 30, Lake County will maintain records of the amount of clay (cubic yards) that Lake County removed from the described pit. This information will be provided in writing to the District Ranger in October of each year.

PIT DEVELOPMENT NOTES

1. Work shall conform to the requirements of Section 611, and as noted on the plans. All pit development and related work is subsidiary to and paid for under Pay Item 203(10).
2. Clear and grub as per requirements of Specification 201, using slash treatment Method 4.
3. Excavation of material from pit: The material shall be removed from the pit in accordance with the stakes set by the Engineer and NO material shall be removed until the Engineer has set the stakes. Material pits shall be excavated neatly to the depth of existing pit. Where the bottom is above the normal water table it shall be sloped to drain as directed by the Engineer.
4. Restoration:
 - A. Shape pit side slopes a minimum of 3:1, except working clay face shall be left vertical.
 - B. Seed, fertilize and mulch all areas disturbed by this project as per requirements of Specification 625.
 - C. Upon completion of hauling, access road shall be graded and any necessary drainage work done to prevent environmental damage.
 - D. Upon completion of excavation from wet pit all berms shall be removed.
