Subject: N. Hancock Road @ school crossing

Joe,

I met with Fred this morning and his direction is to install the crosswalk and median as described in a plan that Alan is working on now. We need to let Pospcich know there will be a change in this area and will have a plan and scope to them very soon. Denis Deitz is working on the specifications for the RRFB's that we would like Pospcich to install. We believe it would be best for Pospcich to close this crossing until these items are complete. Please have Pospcich install sidewalk closed signs as needed and direct them to cross at the Fosgate signal as this is the safest route for now. We will also be installing street lights, please contact JD Purcell (352-569-9639) and set up a meeting on site for Tuesday 3-1-16 to discuss most practical method of installation.

Robert,

Please contact the High School principle and let her know what our intentions are as described above. Also let her know once we have a clear plan we will be setting a meeting with School Board folks, City of Minneola, and Lake County. Thanks for your continued help with this project.

If I have missed anything please interject.

Terry Scott
