Subject: RE: N. Hancock plan revision - to Pospiech

Bob,
It isn't going to be much. The profile changed a little. We will have to add a single pipe run (120' 24" RCP) of storm to the end of the project, otherwise, they would have to tear out trail and curbing to install it (S-248 to end of project limits).

There was also a slight deviation at the PC (STA 268+02) to follow the existing alignment which resulted in a 3.5' shift west at the very end of the project. We are doing the final handshake with AECOM on agreeing with alignment, and should issue these dwgs in next day or so.

Thanks.
Alan

All,

We need to issue revised plan sheets and delete old sheets out of the contract. Same needs to be addressed to Pospiech as RFP-14. Pospiech will need to evaluate plans to see if there would be any cost and or time change.

Have plans been evaluated to see if there would be any quantity changes? Are there any new items of work?

If I can get PDF copy of revised plan sheets I will issue RFP to Pospiech. Quantity information that would be available would also be helpful.

Deb,

I need to issue a plan change for N. Hancock. It is a profile and re-alignment change where the Turnpike will connect with N. Hancock.

Do we have a addenda change number for it, so I can add it to the bottom of the sheets?

Thanks,

All-

See email below, hopefully we will have plans soon on the tie-ins.
Thanks.

Alan,

Did you receive anything on this?

Jeff,

Just checking in with you on this. I am soon to receive a formal letter from my contractor on whether to build to plan or cause some delay. This was discussed at our meeting yesterday.

Please forward me a timeline on receipt of this as I could sure you use this information. I would rather us not demo brand new road work to meet your change.

Thanks,
