Subject: N. Hancock Road

Jeff,

A couple of things that didn't come up today, that we have questions about.

The change order for the signal that was related to Addendum #6, came in at an amount of \$15000.00, Lake County reviewed the information and felt the amount should be \$1700.00, what is the status of this change order.

Secondly, the recent TCD directional bore for the mast arm at the existing Old 50 and Hancock Road signal is showing some settling on the south side, when that area is reworked will need additional compaction for this area.

Finally, the question was asked to Pospiech, when milling would take place for the project. Pospiech couldn't give a date at this time. Lake County will need 48 hours notice when this work will occur.
