The bulldog button with LED and two tone beep. Should be fine. We don't need an audible voice. That's a lot less cost right?

Terry,

The bulldog button gives an LED indication that you've pushed the button and a two-tone beep for this type of unit. The audible ped button you can use a standard voice message that will last the duration of the programmed time to cross.

Thanks Chris

Chris,

I want to be sure I'm clear on this. What we have on order right now will beep when the button is pushed and will only beep for a few seconds with the lights continuing to flash. The quote below will provide an audible beep for the entire duration of the lights flashing.  
Thanks for all your help with this.
